

A EXERCISE • 實戰演練

Question: When was the last time you had a cold or the flu? What do you do when you have a cold or the flu?

Every year, flu viruses make people sick. I remember last time I had the flu was last spring. That was pretty bad. I had coughs, headaches and a fever, and my whole body was aching. I stayed in bed for almost two days, and finally recovered.

When I get a cold or the flu, I will go to see a doctor, stay home and rest. If you have a cold or the flu, don't go to work or school because you're only going to make other people sick. Take some time off, make sure you recover, and get well.

B LANGUAGE FOCUS • 學習焦點

1. I remember last time ...
